

STORM'S SNOWPLOW 2022

The reliable steel, stamped plow. Available in red and black colors.

The stiff trip springs protect the ATV / UTV body from a plow bouncing in case of obstacle hitting.

Enhanced stiffness of the plow

The square push tube provides max. stiffness of the construction.

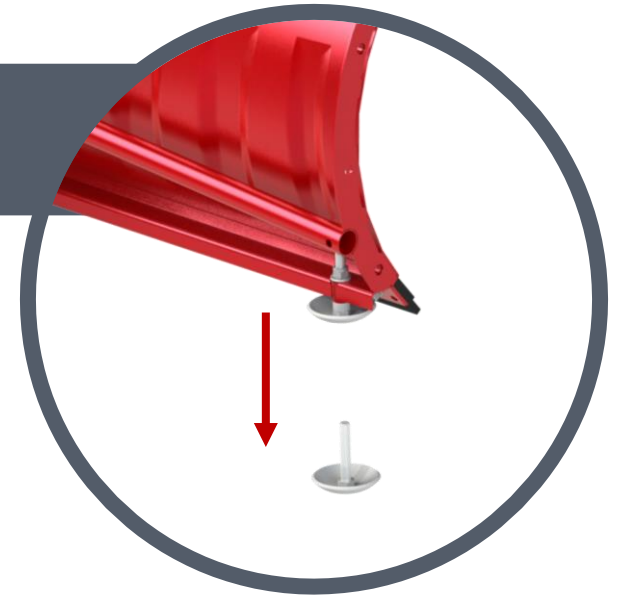

The new quick attach kit (**MP0755**) – makes the process of attachment / detachment easier. The wire is laid in tubes - significantly reduce a change of damage.

Snowplow upper extender (**MP0375**) – allow to take more snow. Available colors – red, black.

Adjustable plow skids

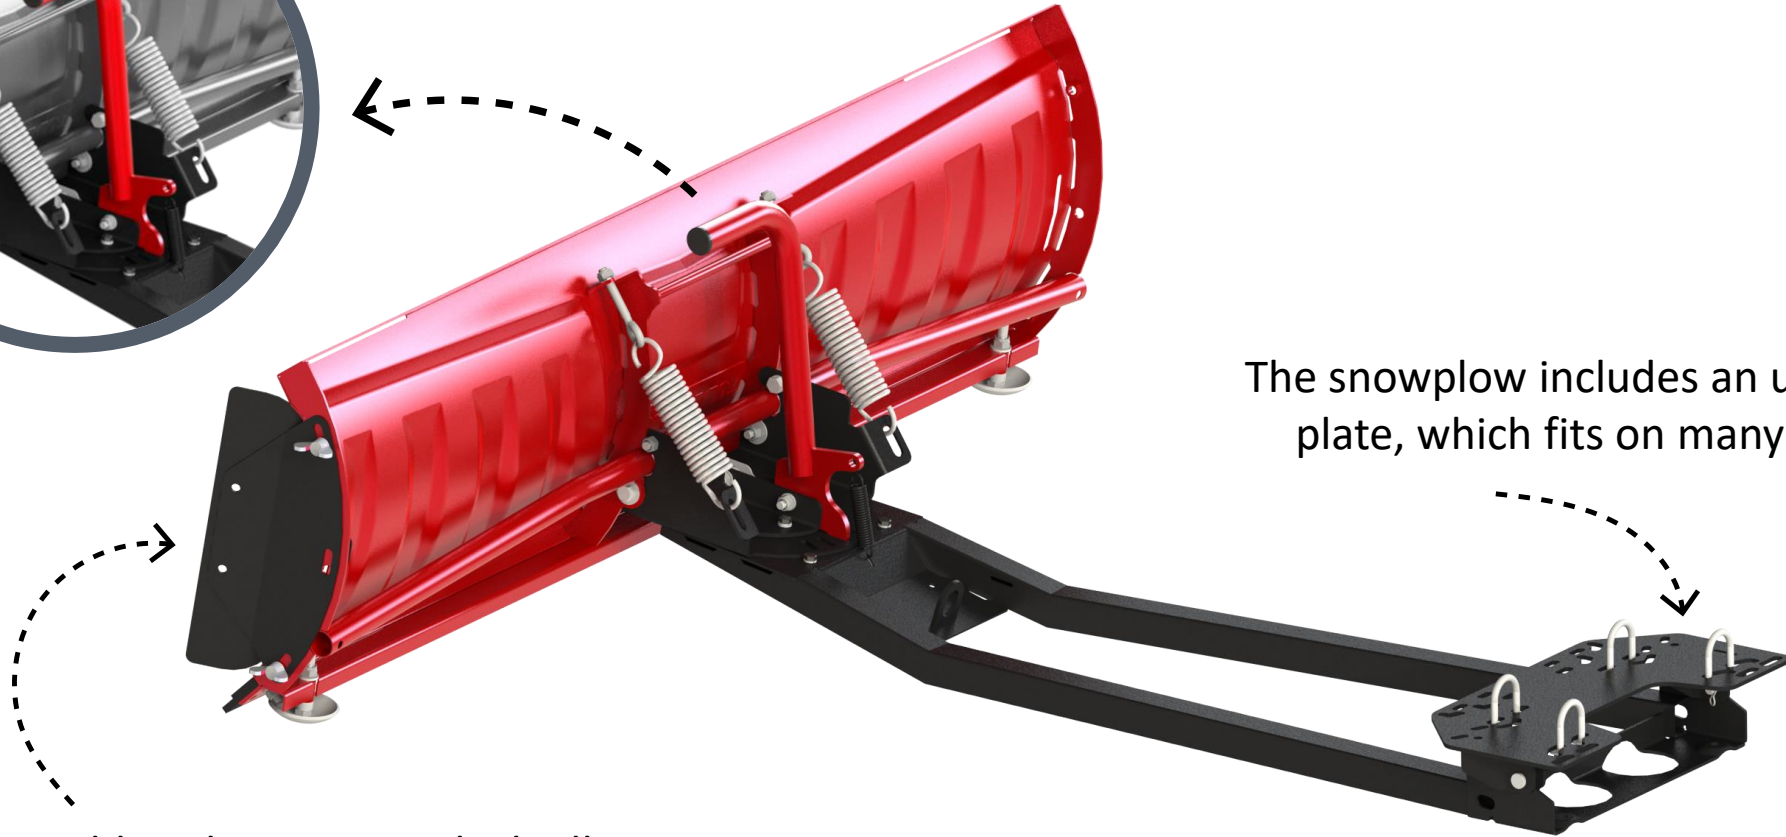

Snowplow side extender (**MP0362**) – expands plow on 17 cm with each side. Available colors – red, black.

Rubber wear strip protects the plow from scratches.

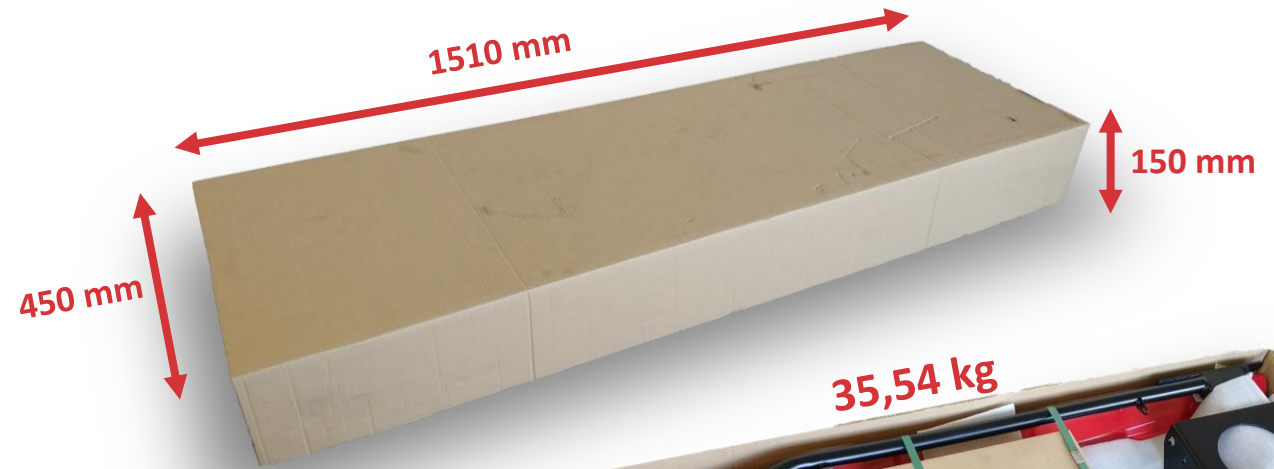

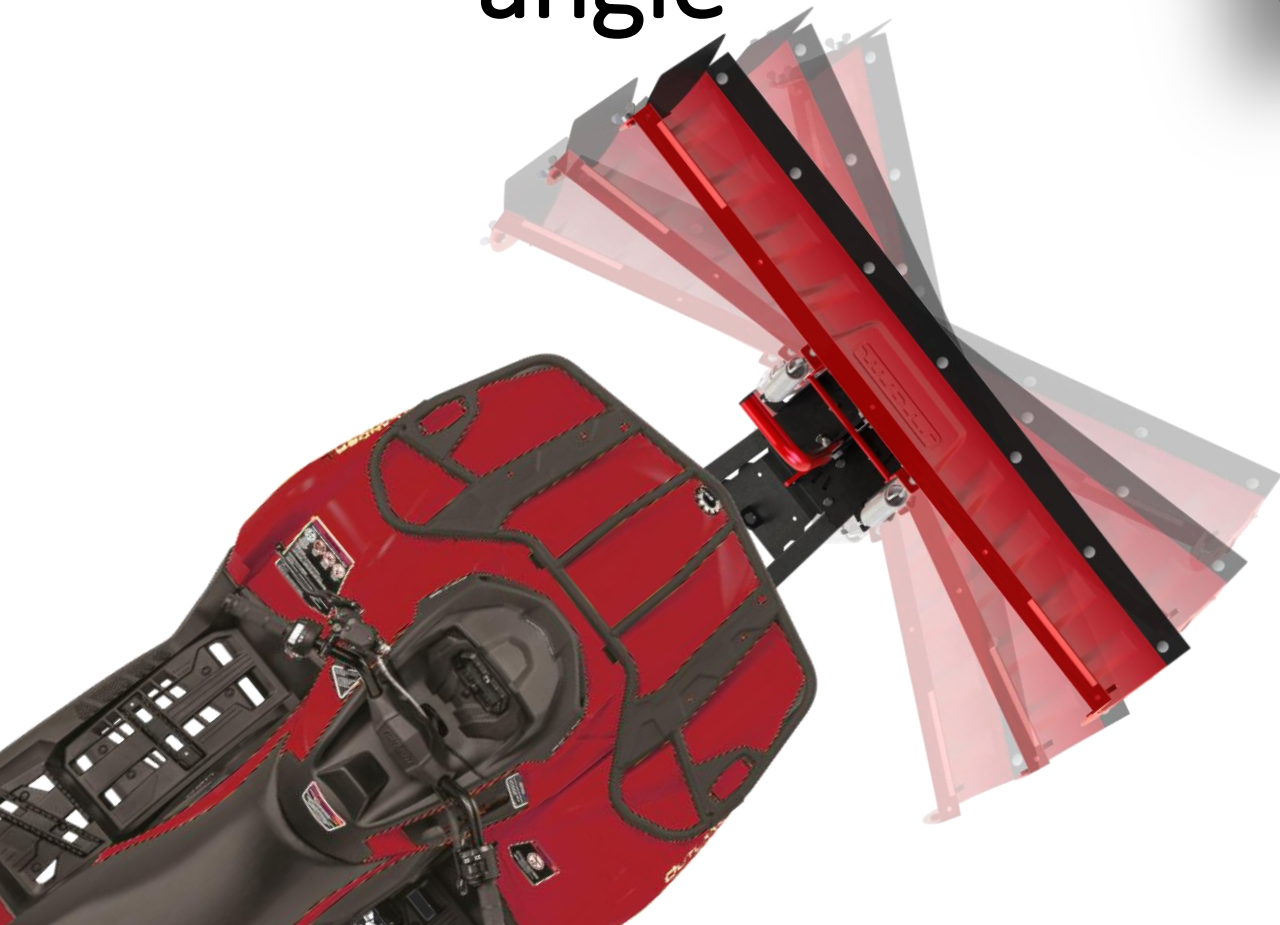

The new handle for adjusting the blade angle. The handle has a red color.

The snowplow includes an universal mount plate, which fits on many ATV models.

There is a removable side stopper, which allows to effectively shovel snow.

5 position blade angle
